

## Description

The LM2575T switching regulators are monolithic integrated circuits designed for use in "buck" or "buck/boost" regulator applications requiring accurate output voltages over combined variations of line, load and temperature. This unique series greatly simplifies switching power supply design.

The LM2575T has a maximum output current of 1A and the LM2575T is rated for 3A.

The LM2575T series miniconverters include a switching regulator and compensation network all within the same package. Just add a choke, catch diode and two capacitors to obtain an efficient DC-to-DC converter. The current limit and thermal shutdown features of the LM2575T fully protect the device against overstress conditions.

The LM2575T series offers an alternative to popular 3-terminal linear regulators by providing higher efficiency with reduced heatsink size. In many applications a heatsink will not be required.

## Features

- ◆ Pin for pin replacement for National's LM2575T/6T series
- ◆ DC-to-DC buck or buck/boost converter requiring only 4 support components
- ◆ Fixed or adjustable voltages
- ◆ Preset output voltages of 3.3V, 5V and 12V
- ◆ Wide output voltage range, 1.23V to 35V
- ◆ 82% typical efficiency @ 5V out
- ◆ Wide input voltage range, 4V to 40V
- ◆ Inhibit/enable control pin
- ◆ Industrial temperature range
- ◆ TO-220 and TO-263 packages

## Applications

- ◆ Micro controller power supplies
- ◆ Medical equipment
- ◆ Industrial power supplies
- ◆ Instrumentation power supplies

	LM2575T	LM2576T
L <sub>1</sub>	330μH	100μH
D <sub>1</sub>	3A	7A
C <sub>IN</sub>	68μF	120μF
C <sub>OUT</sub>	330μF	1,000μF

## Typical Application Circuits

## Absolute Maximum Ratings

Parameter	Symbol	Maximum	Units
Input Voltage	$V_{IN}$	45	V
On/Off Pin Input Voltage	$V_{ON/OFF}$	$-0.3 \leq V_{ON/OFF} \leq V_{IN}$	V
Output Voltage to Common (Steady State)		-1	V
Power Dissipation	$P_D$	Internally Limited	W

					12	30	$\mu A$
					0	10	

**Notes:**

- (1) Output sourcing current, resistive load, no inductor or capacitor.
- (2) Feedback =  $V_o + 1.0V$ .
- (3) Feedback = 0V.

### Pin Configurations

**TO-220-5**

**TO-263-5**

### Ordering Information

(1) -XX = Voltage Option. Available voltages are 3.3V (-3.3), 5V (-5.0), 12V (-12), and ADJ (-ADJ), which is adjustable between 1.23V and 35V.
